

$$\Gamma_0 = \mathcal{C}(\mathcal{C}(\mathcal{C}(\Omega, \Omega), \Omega), 0)$$

Van. Tarski

in hand constructed - given the
 $0, \Omega$ and $\mathcal{C}(\alpha, \beta) = \beta + \omega^\alpha$

$\rightarrow \psi(0) = \Sigma_0$?

$\psi(d) = \omega^d$?

$\psi(0) = \omega^0 = 1$?
